

Linsen(Forrest) Gao

Email: linseng457@gmail.com
Mobile: 1-647-564-6577

Portfolio: linsen-gao-457.github.io
Github: github.com/Linsen-gao-457

Education

University of Waterloo <i>Master of Engineering - Electrical and Computer Engineering</i>	Sep 2024 - Present Waterloo, Canada
Nanjing University of Posts and Telecommunications <i>Bachelor of Engineering - Telecommunication Engineering (GPA: 90.04, Ranking 30/586)</i>	Sep 2020 - Jun 2024 Nanjing, China

Skills

Programming Language: Python, MATLAB, C, Verilog, Java
Language: Mandarin(native), English(proficient)

Research

Open-Source Reproduction of SWIM-X <i>Supervised by Prof. Jimmy Lin</i> <ul style="list-style-type: none">Reproduced and enhanced the SWIM-X multilingual dense retriever for low-resource languages, focusing on YorubaDesigned a modular pipeline integrating BM25 + KaLM-based hard negative mining, LLM-assisted evaluation, and LoRA-based fine-tuning of Qwen2.5-3B	Feb 2025 - May 2025 Waterloo, Canada
SA-CNN Emotional Detection System for Facial Expression <i>Supervised by Prof. Minghai Xu</i> <ul style="list-style-type: none">Integrated convolutional neural networks (CNN) with self-attention mechanisms to enhance model performance, achieving an overall system accuracy rate of 85%Implemented a YOLO-based model for precise face detection to accurately isolate faces from images in various environments	Jan 2024 - Jun 2024 Nanjing, China
EEG/EMG-based Emergency Brake Prediction <i>Supervised by Prof. Liya Huang</i> <ul style="list-style-type: none">Collaborated with a cross-disciplinary team to integrate multiple data sources, including an EEG cap, smartphone accelerometer, and a homemade FPGA for muscle contraction testingImplemented a weighted fusion algorithm by using multiple data sources to predict final results, showcasing proficiency in algorithm development and integrationAwarded 2023 Outstanding Conclusion of Student Innovation and Entrepreneurship Project (TOP 1%)	Jan 2022 - Jun 2022 Nanjing, China

Experience

Software Engineering Intern at ENN Group <i>GPT Collaborative Knowledge Base Module for Enhanced Q&A</i> <ul style="list-style-type: none">Independently trained Transformer-based model for one of China's largest energy companiesAchieved 90% answer accuracy rate for company's confidential proprietary knowledge baseIntegrated deployed model with company's internal messaging platform	Jul 2023 - Sep 2023 Nanjing, China
---	---------------------------------------

Project

E-Commerce Web Application Development <ul style="list-style-type: none">Collaborated with back-end developers to build a React-based e-commerce platform using RESTful APIsFollowed Agile development practices, actively participating in sprint planning, code reviews, and promoting best practicesDesigned dynamic user interfaces, ensuring an intuitive user experienceWrote front-end unit and integration tests using Vitest, improving reliability and test coverage	Jan 2025 - May 2025
Trust Region Optimization with Automatic Hyperparameter Tuning <ul style="list-style-type: none">Conducted optimization experiments on a one-hidden-layer MLP trained on the CIFAR-10 dataset using Trust Region and SGD methodsEmployed Ray Tune to automate hyperparameter tuning, improving reproducibility and performanceAnalyzed performance differences to assess stability, convergence, and efficiency in non-convex settings	Jan 2025 - May 2025

Awards

Outstanding Conclusion of Student Innovation and Entrepreneurship Project (TOP 1%)	May 2023
School-level first-class scholarship (TOP 5%)	Jun 2024
School Class Club Contribution Award	Sep 2021
The Second Prize of Electronic Design Contest for College Students (TOP 5%)	Jan 2021
Provincial Second Prize in Advanced Mathematics Contest (TOP 5%)	May 2021
